EDUCATION

FULLSTACK SOFTWARE DEVELOPMENT PROGRAM,
SUNCOAST DEVELOPER GUILD
SAINT PETERSBURG
2019

PREVIOUS PROJECTS

SafeSitter:

I created an original fullstack concept website. Using Html, Css, Javascript, React and C#. I also created an original API to help communicate with the users.

BlackJack:

I created a single player black-jack game . I used loops, conditionals, and other control structures to implement control flows.

MineSwipe:

I recreated the classic game MineSweeper using a back-end API server to create the user-interface clone version. I also used React, Rest APIs, Axios, and Postman.
